Lithoss

07. Dimmer

Design by Lithoss

For our DIMMER collection with its contemporary vintage look we let ourselves be inspired by the handles and cone-shaped buttons in a cockpit. Thanks to dimming modules and home automation systems dimming has become a normal thing now. But nothing can beat the feeling of turning a real button and creating atmosphere and cosiness. Lithoss allows you to do this in style.

The button's design – the traditional cone shape or the diamond-pattern knurl shape – is a piece of real craftsmanship: manufactured in a masterly way, with an excellent grip and an authentic touch. In combination with the cockpit switch you can integrate a contemporary vintage look in your interior in a stylish manner.

Dimmer

46 Textured Black + Brass Knurl

Available in

1-10V

02 Matt White

35 Matt White + Textured Black
