24 Coming soon ... Lithoss Luminaires

We found the key! Obviously, the conical shape of that Lithoss keyring was not a randomly chosen design. It was the teaser to announce a brand new collection of mechanical design switches.

Today, we can proudly present our long awaited cockpit collection: sharply designed switches with an edgy touch of vintage. Cockpit is a 10-ampere two-way switch that can be connected directly to all conventional installations. It is available in the magnificent Lithoss finishes, of which we've already selected the most beautiful combinations for you. Pay particular attention to the unique matching caps and handles. From timeless and classic to modern with a touch of vintage. Suited for all interiors. Now available.

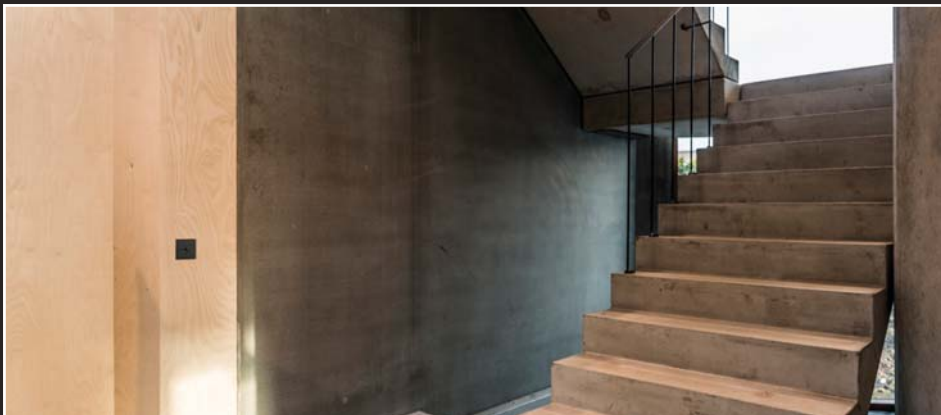

This is just the beginning, there's more to come in 2016...

Introduction

Project 411

www.411sessions.be

handmade in Belgium !

New collection: Cockpit

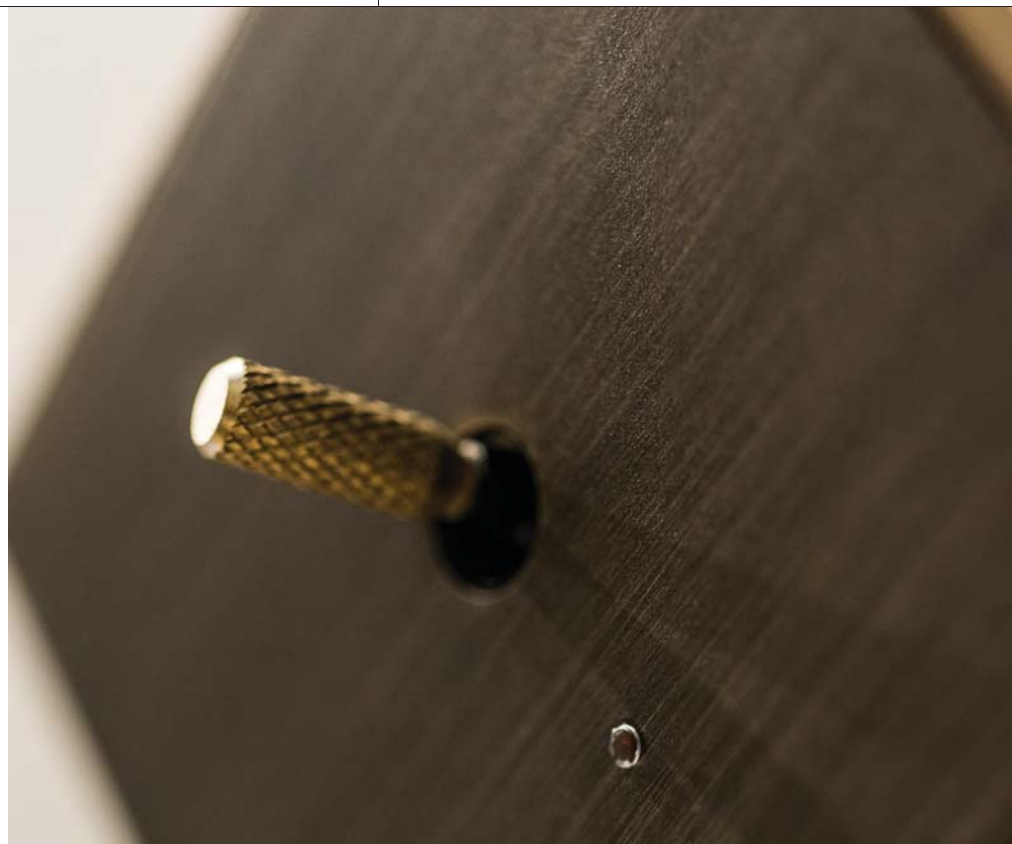

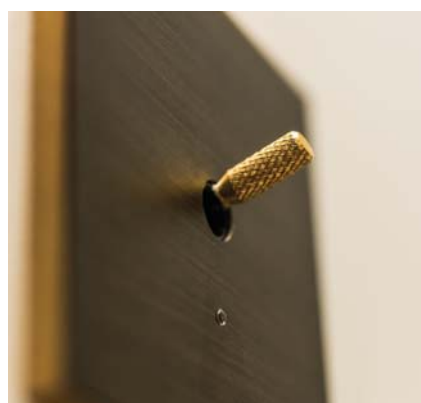

Cockpit offers the ultimate design solution for all your renovation projects. This 10-ampere two-way switch can be connected directly to your conventional installation. You no longer need stepping switches!

Optionally, mounting clips and an amber-coloured neon indicator light are available.

For the fans, Cockpit is also sold in a pushbutton version (same design) that can be connected directly to your home automation system.

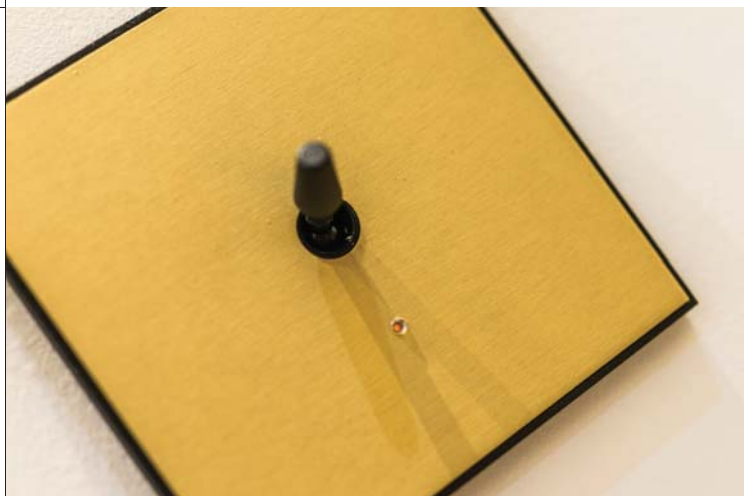

Cockpit is available in the well-known stylish Lithoss Select finishes, including our updated bronze antique and the new public's favourite tin antique. Finishes that generate a striking effect in both traditional and ultramodern interiors.

Besides, the unique character of this cockpit switch is not only expressed in the handmade finishing but also in the matching caps & handles. The cone shape creates a classic and timeless look whereas the knurl shape gives your switch that highly appreciated touch of vintage.

Now available: Cockpit presentation box

To highlight the launch of the COCKPIT collection, we've made a beautiful presentation box for 1 cockpit switch. Ideal for presenting it as a sample to your customer or for proposing it in your project.

Project: Private villa

Cockpit Textured White

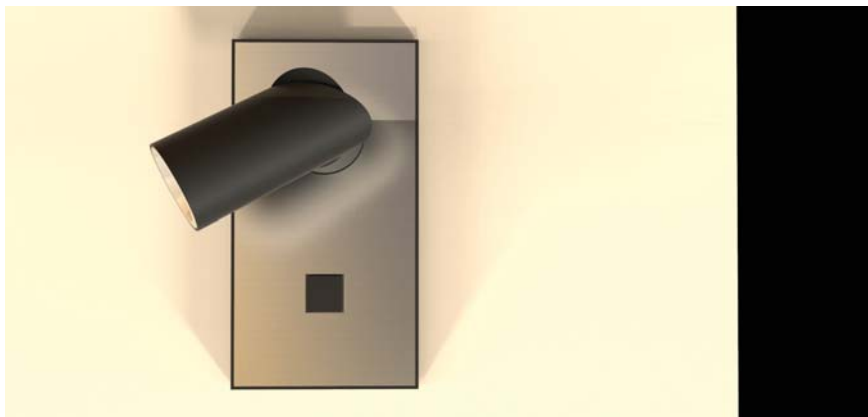

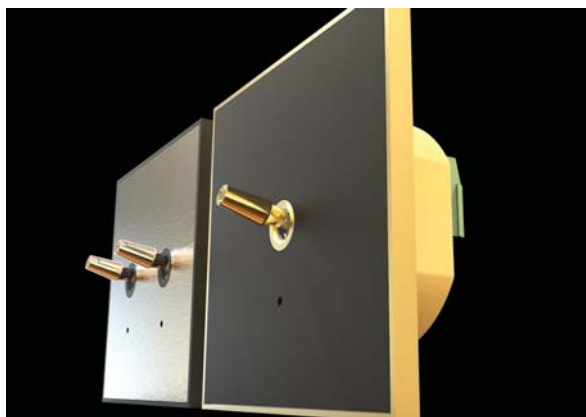

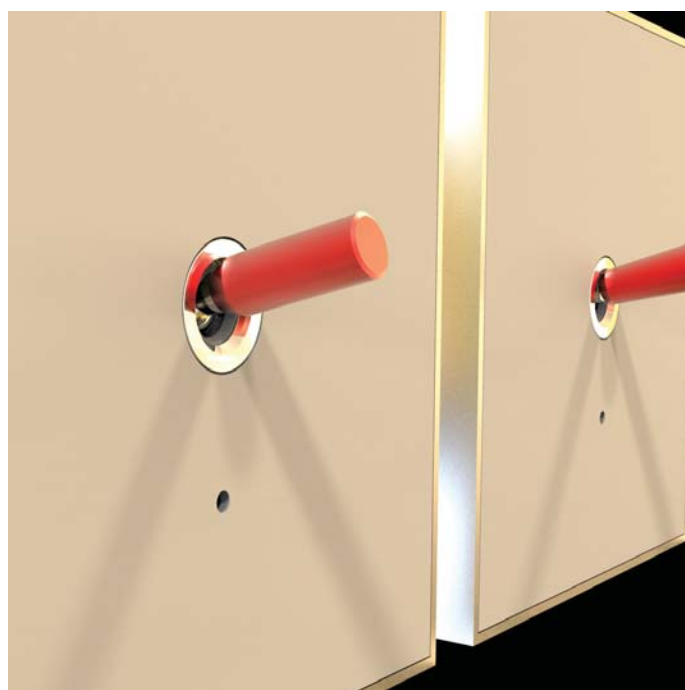

R&D nieuws: Keyshot

At Lithoss, design comes first. That is why we have opted for a new rendering package named Keyshot, which allows us to make very beautiful, photorealistic pictures of products during the development process. Keyshot is worldwide the reference for amazing rendering results & animation. Therefore, we are very proud of this investment.

Updated finish: Nickel

The classy nickel finish of Lithoss is given a new and more refined look with optimised gloss level that really brings the finish to life. This updated finish shows just that little bit of extra detail and is ready to shine in your interior.

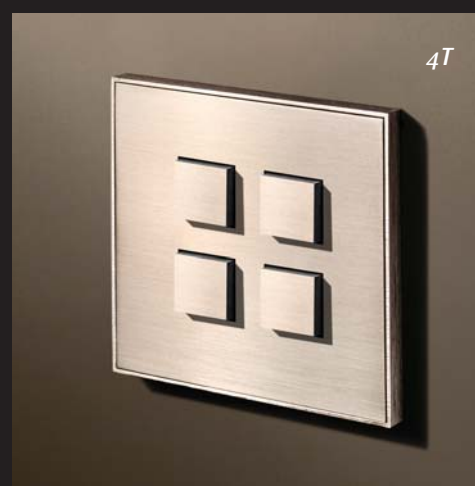

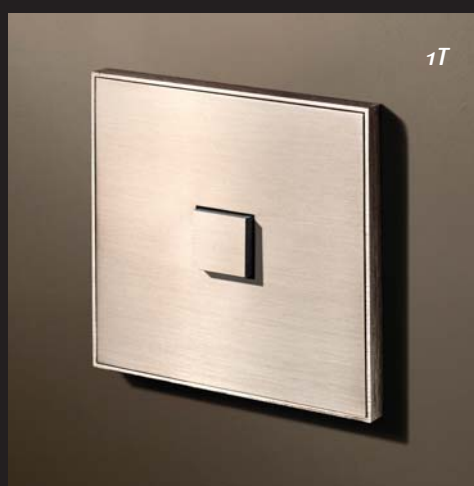

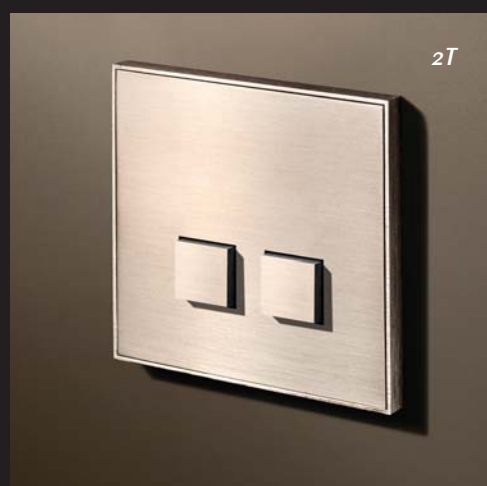

Be careful: the product codes have been adjusted, the old colour code for nickel was 05, this will now become 09.

For instance: 1T 24V

Li11105 --> Li11109

24V + LHP Frame : Li17G09
250V + LHP Frame : Li17L09

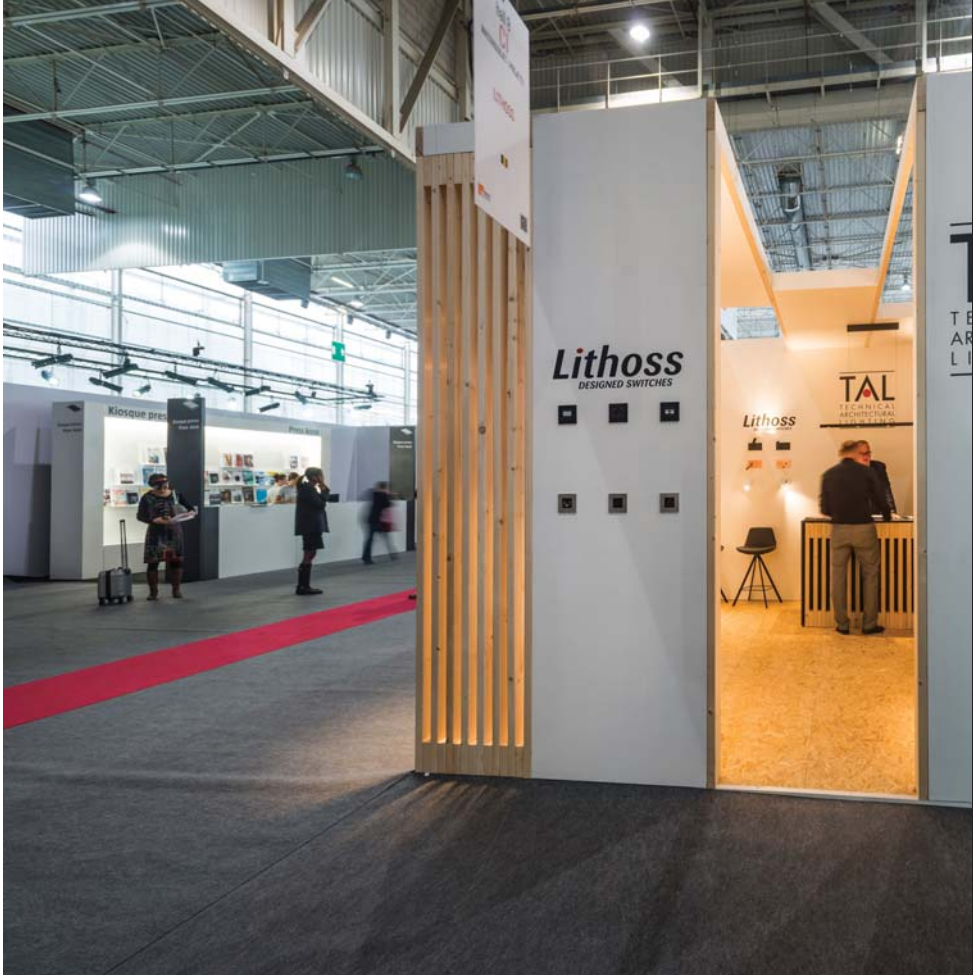

24V : Li12109
250V : Li12309

24V : Li11109
250V : Li11309

24V : Li13109
250V : Li13309

Lithoss presentation in China

The Lithoss – handmade in Belgium – design products are obviously quite popular in China. We were proud that we were invited by our distributor DVACO to come and give a presentation for their most important customers early 2016.

Who we are

Lithoss

DESIGNED SWITCHES

Lithoss is a Belgian manufacturer specialized in the design, development and production of high and medium voltage switches.

Lithoss has a strong focus on the level of **RESEARCH**, **INNOVATION** and the use of **COMPACT DESIGNS**. The unique **compact design** makes our range a unique market segment.

All our products are from **100% steel** and **100% copper** origin and are **designed and assembled in Belgium**.

Now our switches are **100% compact** and have a **compact design**.
